

# SOLID

IT infrastructure management  
from A to Z

## SolidIT

a company that provides a comprehensive range of IT infrastructure management services:

DBMS (data base management systems)

Operating systems and software

Network

Security

Data storage

Backup

Hardware and many other things

## Management:

the company management has successful many-year management experience in leading Russian IT and communication companies.

## Staff:

a team of highly skilled experts is certified by top software and hardware manufacturers (HP, Oracle, Cisco, IBM, Juniper, Huawei, Microsoft, Redhat, Symantec, Altiris, Citrix).

## Geography:

over 200 specialists presented in both Moscow and all federal centers of Russia.

## Service:

a wide range of services in the area of information technology from initial consultation to creating the company's IT-infrastructure on a turnkey basis.

Company and IT department managers daily face various difficulties:

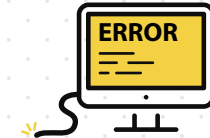

**High cost**  
of IT infrastructure  
maintenance

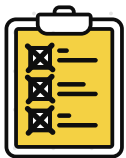

**Low efficiency of**  
infrastructure or its components

**Security, data storage**  
problems

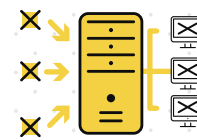

**Low fault tolerance,**  
failures, breakdowns

**Lack of**  
necessary  
expertise

**Infrastructure operates**  
below optimum efficiency

**No resources for**  
project

**Staff**  
Hiring professional  
employees of IT  
department

**Company's data**  
exposure to cyber  
attacks

## Cutting costs for

IT-infrastructure (choosing the optimal platform and software (migration to x86), monitoring of hardware, software license use). IT-infrastructure outsourcing.

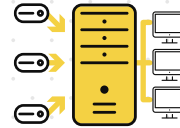

## Prompt solutions

Immediate response of SolidIT staff to emerged problems.

## Risk mitigation

Auditing security, fail-safety, backup system, DRP availability, logging of SolidIT experts' actions, etc.

## Resources

Opportunity to attract additional resources for projects.

## Total efficiency

of existing IT infrastructure (improving infrastructure efficiency, virtualization, complete control over resources, etc.)

## Security

We ensure clients' data security, including in cloud.

## Improving IT infrastructure efficiency

(identification and elimination of causes of breakdowns, improving fail-safety due to clustering).

## Convenience and flexibility

in providing services, individual approach to each client.

# We offer

solutions to any IT tasks

8 (495) 222-66-73  
info@solidit.ru  
www.solidit.ru

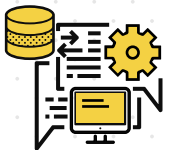

**Turnkey projects**

**Security**

**IT consulting**

**Wide range of IT-services**

Creating fail-safe infrastructure in accordance with requirements to Customers' information systems

Enhancing infrastructure fail-safety and capacity

Server infrastructure virtualization

Introducing centralized monitoring system. Building a resource service model.

Desktop virtualization. Shifting from PC to thin clients

Developing a backup system

Infrastructure migration to cloud

Creating a DRP plan

Building a Private Cloud

Introducing CMDB

# Ensuring security

of all IT infrastructure components

www.solidit.ru

- ◆ Ensuring network security (firewall setting).
- ◆ Establishing VPN channels.
- ◆ Data encryption.
- ◆ Providing antispam-protection.
- ◆ Providing virus protection of PC, mail servers.
- ◆ Providing data loss protection (mirroring, backup).
- ◆ Security audit for vulnerability (external scanning, LAN scanning).
- ◆ Company analysis for exposure to cyber attacks, taking steps to eliminate exposure.
- ◆ Complete control of carried out actions: work of our specialists is logged and all their actions get under stringent control of the company management.

## We offer a complete list of consulting services:

- ◆ IT infrastructure audit.
- ◆ Infrastructure reliability and accessibility analysis.
- ◆ IT security audit.
- ◆ IT system related risk analysis.
- ◆ IT processes performance evaluation.
- ◆ Cost-effectiveness analysis of investment in infrastructure.
- ◆ Optimization opportunities and options.
- ◆ Elaboration of SLA (service level agreement)/KPI (key performance indicators).
- ◆ Development of IT staff motivation system.

# A wide range of IT services of any level

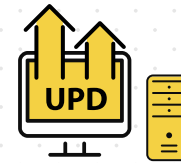

8 (495) 222-66-73  
info@solidit.ru  
www.solidit.ru

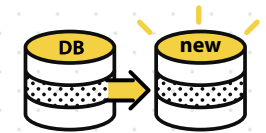

Emergency support

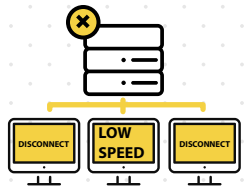

Maintenance of any IT infrastructure component or migration to new equipment

System software upgrade

DB migration to a new version

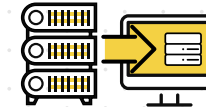

Solving IT infrastructure or its components performance problems

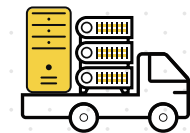

Improving reliability, including clustering

Migration to cloud

Server virtualization

Organization of equipment transfer to a new data center

- ◆ Server hardware (HP, IBM, Oracle, Huawei, Cisco)
- ◆ Data storage system hardware (EMC, HDS, HP, IBM, Oracle),
- ◆ Storage network hardware (SAN) (Brocade, Cisco, HP)
- ◆ Data processing center and office LAN (local computer networks)
- ◆ Network equipment, network firewalls (Cisco, Juniper).
- ◆ WiFi network equipment
- ◆ OS (Windows, Linux, Solaris, etc.)
- ◆ Virtualization systems (VMware, Hyper-V, KVM)
- ◆ DBMS (Oracle, MSSQL, opensource)
- ◆ Proxy-servers (Squid, Bluecoat)
- ◆ Veritas Cluster and Veritas Storage Foundation
- ◆ Backup systems (Netbackup, Networker, DataProtector)
- ◆ File servers, mail servers, antispam filters
- ◆ AD, Microsoft DNS, Microsoft PKI infrastructure
- ◆ Citrix infrastructure
- ◆ IDM infrastructure
- ◆ Symantec Endpoint Protection infrastructure
- ◆ Symantec Management Platform (Altiris) infrastructure
- ◆ Vendor IT support contract maintenance
- ◆ Monitoring of equipment, IT-services, SLA
